

GND: connect GND	VCC: power supply
OUT: Signal output	NC: no need connect
Working Voltage: 3.3V/5V	Size: 29.4mm*28.8mm

The collision detection module(Limit switch) is a commonly used switching element.

Use the collision of moving parts to turn on the circuit, the OUT pin outputs a high level when circuit is turned on.

This module possess a wide range of applications, which can be used for collision detection, travel limit, or as an ordinary switch.
